Canary in a Coal Mine

Building a company from start-up to the point of sustainability, year-over-year growth and increasing market share is, without a doubt, the hardest thing to accomplish in the business world.

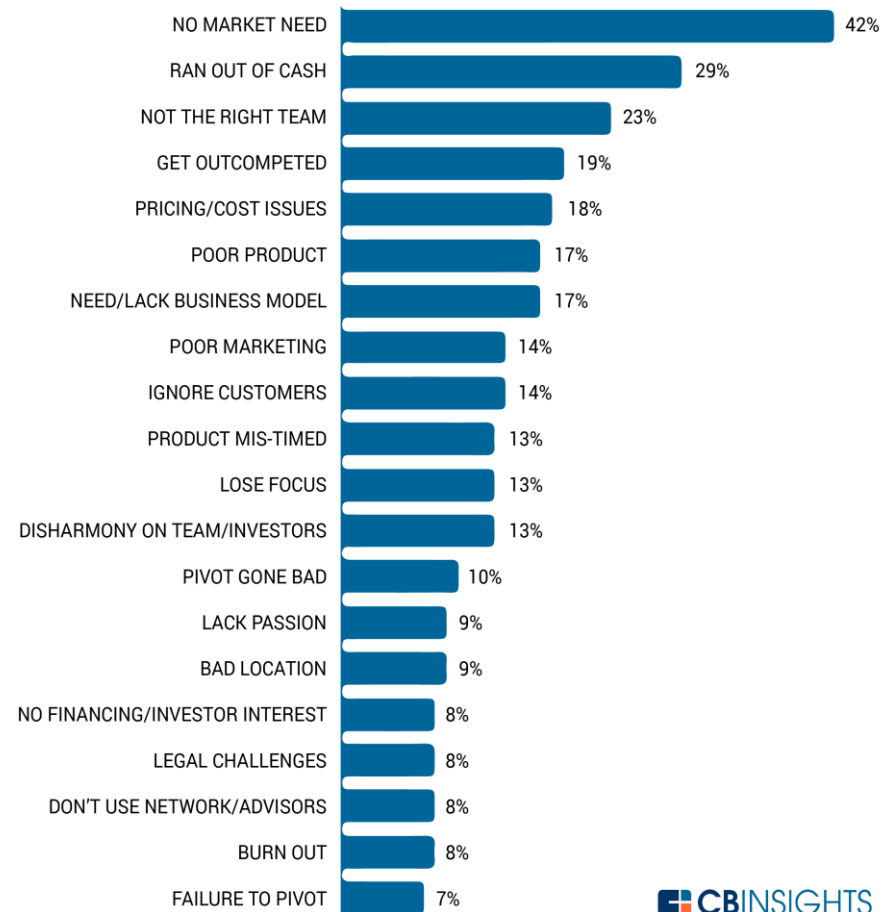

If a company is successful in the execution of its business plan, it will be reflected in its market cap. The emerging company graveyard is filled with companies whose main focus was the short-term performance of its equity.

We understand and have experience with the high expectations of stakeholders. ISD can assist management in creating an exciting story, while keeping shareholders and the investment community connected and informed.

Our goal is to help you perform and to stay *out* of this Top 20 list.

Capital Formation

The **Jumpstart Our Business Startups Act** (“JOBS Act”) has introduced significant changes in many of the rules and regulations under which both private and public companies are able to fund their business plans. Issuer and investor requirements, restrictions and exemptions have been redefined and reconditioned considerably, resulting in a much deeper investor pool. In addition, reward and equity **Crowdfunding**, when combined with the global reach and scale of the digital highway, profoundly broadens the capital resources for growing companies.

Determining a suitable, timely and cost-effective plan for obtaining working capital can be challenging with these alterations in the funding landscape. Our investment banking, and legal and accounting partners provide expert guidance in determining the best vehicle for a company’s capitalization, among them:

- Equity/Debt Offerings
- Regulation A+
- Regulation D 504
- Regulation D 506(b) and 506(c)
- Rule 147 Intrastate Offerings
- Reward and Equity Crowdfunding
- Equity Line
- Convertible and Non-Convertible Debt
- Factoring
- Shelf Registrations
- Credit Line
- Going Private Transactions
